2009 VIRGINIA INDUSTRY LEADERSHIP FORUM

Manufacturing 2025

December 3-4, 2009 Charlottesville

Continuing our theme of world-class innovation and leadership, don't miss Dec 3rd Keynote Speaker **Patrick Collignon, VP & General Manager of Volvo Trucks North America, New River Valley Plant.**

Patrick joined Volvo Trucks North America, New River Valley Plant, in December 2008. He is utilizing the current economic climate to prepare the New River Valley plant for future opportunities. While leading the evolution of continuous process improvements through the Volvo Production System, he is driving an initiative to create North America's first CO₂ neutral automotive manufacturing facility in Dublin, Virginia.

Make sure to also catch Dec 4th Luncheon Keynote Speaker **Kate Brass, Ecomagination Project Leader for GE Energy and GE Oil & Gas.**

Be sure to participate in our *Manufacturing 2025* program the afternoon of December 3rd as well. In particular, share ideas with other members of industry during our moderated discussion on Facilities Management led by the following panel:

- Tim Davidick, Managing Director, ADM Micro
- David Jones, President, Globe Energy
- Patrick Collignon, VP & GM, Volvo Trucks North America
- Larry Blanchfield, Energy & Solid Waste Management, Northrop Grumman Shipbuilding
